01

spider venom and bites in ohio

In ohio all but one of our spiders poses venom

spider bites are extremely rare because they only bite when they are defending themselves

most people get bite when they touch the spider such as if it was in a glove and you stuck your hand in the glove or if it was on a blanket and you touched the blanket

02

spiders webs and silk

spiders use their silk and webs to protect their eggs

orb-weaving spiders rebuild their web everyday

spiders work from the center of the web to the outside

about spiders in ohio

there are 40,700 spider species world wide but only 620 of those are in ohio

the largest spider is the carolina wolf spider but is now rare in ohio

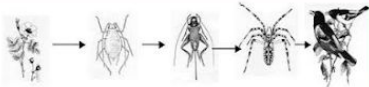

our smallest spider is the dwarf hunting spider they are only 1mm long

what they eat

moths
flies
mosquitoes
and other types of spiders
